#### PRINCIPLES OF

## BOOK KEEPING

EY

#### SINGLE AND DOUBLE ENTRY

#### DEFINITIONS.

- 1. Book Keeping is a faithful and systematic record of business transactions.
- 2. All business transactions consist in an exchange of values.
- 3. There are two methods of keeping books, distinguished as Single and Double Entry.

T

#### SINGLE ENTRY BOOK KEEPING.

- 4. Single Entry embraces only the accounts of persons, while each transaction consists of but one debit and one credit.
- 5. The books used are the Cash Book (Livre de Caisse)—Invoice Book (Livre de Factures)—Sales Book (Livre de Ventes)—Bill Book (Livre de Billets)—Day Book (Mémorial ou Brouillard)—and Ledger (Grand Livre).

- 6. Three of these books appear to be indispensable:—the Cash Book, Day Book and Ledger. The others are termed auxiliaries.
- 7. The Cash Book.—In this book are entered all receipts and disbursements of cash.
- 8. The *Debtor* side shows all amounts received and the *Creditor*, all amounts paid out.
- 9. The difference between both sides shall be the exact amount of cash on hand.
- 10. The *Invoice Book*—contains a statement of all merchandise with which we are concerned, or copies of Invoices of all goods purchased.
- 11. The Sales Book—contains a description of all merchandise we sell or that pass out of our possession.
- 12. In the *Bill Book* is entered a description of all notes, drafts or other species of paper against us, or in our favor.
- 13 There are two kinds of Notes, called: Bills Receivable (Billets à recevoir)—and Bills Payable (Billets à payer).
- 14 Bills Receivable are notes in our favor, the amounts of which we are to receive.
- 15 Bills Payable are notes against us, the amounts of which we are to pay
- 16. The *Day Book*—is a book wherein is kept a consecutive history of all business transactions, in the date and order of their occurrence.
- 17. The entries in this book should be direct and concise;—expressing:—first, the name of the person, with the fact of his being Dr or Cr, and next, the consideration and amount.
- 18. The *Ledger* is used to exhibit the results of all transactions arranged under proper heads called *accounts*.
- 19. An Account (un compte)—is a statement of our dealings with another person. It has two sides, a Debtor—Dr (Doit)—and a Creditor—Cr (Avoir).
- 20. On the Dr side is shown what is owing to us, and on the Cr what is owing by us.
  - 21. If the Dr side be the greater, the difference or

Balance will express an amount belonging to us:—a Resource.

- 22. If the Cr be the greater, the difference or Balance will be an amount which we owe :—a debt or liability.
- 23. Posting the Books—consists in collecting and transferring the items of each person's account from the Day Book to its appropriate page in the Ledger.
- 24. At any time the condition of the business may be shown by a *statement*, which must embrace a list of it's Resources and Liabilities.
  - 25. The Resources are found:
    - 1. In the *Ledger*,—Balances due from persons;
    - 2. In the Cash Book,—Balance of cash on hand;
    - 3. In the Bill Book,—Bills Receivable;
    - 4. By the Inventory of Merchandise unsold.
  - 26. The Liabilities are found:
    - 1. In the Ledger, -Balances due others ;
    - 2. In the Bill Book,—Bills Payable.
- 27. To ascertain the Net Capital or Present Worth: Rule:—Subtract the liabilities from the Resources.
- 28. To ascertain the Net Gain during business: Rule: —Subtract the Capital at Commencing from the Capital at Closing.

#### II

#### DOUBLE ENTRY BOOK KEEPING.

- 29. The characteristic feature of *Double Entry* consists in entering each transaction into *two* or *more* Ledger accounts, because each transaction always affects two or more persons or things.
- 30. The principal books used in *Double Entry* are: the *Day Book* (Mémorial)—*Journal* (Journal)—and *Ledger* (Gr. Livre.) The auxiliary books are the *Cash Book*, *Sales Book*, *Invoice Book*, *Bill Book*, &c. Their importance varies according to the amount and kind of information they furnish. (For definitions, see *Single Entry*.)
- 31. The Day Book, as in Single Entry, is the book of original entry, containing simply the history of all tran-

sactions, without mentioning the fact of the person being Dr or Cr.

- 32. The Journal decides upon the Debits and Credits involved in each transaction before entering it in the Ledger.
- 33. The Journal is sometimes entirely omitted, at others, it is combined with the Day Book, and is then termed the Journal-Day Book.
- 34. There are four kinds of Journal entries, each consisting, either:
  - 1. Of one debit and one credit;
  - 2. Of one debit and several credits;
  - 3. Of several debits and one credit; or
  - 4. Of several debits and several credits.
- 35. Journalizing is that process by which the Day Book entries are transferred to, and arranged in their proper form, in the Journal.
- 36. The *Ledger*, as in single Entry, shows the results of all transactions, under separate heads termed accounts.
- 37. Posting consists in transferring the entries from the Journal to their appropriate place in the Ledger.
- 38. Every cause producing a *debit* or *credit*,—be it a person or a species of property,—is designated in the *Ledger* by a name, over a statement of all transactions concerning it, which is known as an account.
- 39. In *Double Entry*, there are two kinds of accounts: —Real and Representative.
- 40. Real accounts—always show a resource or a liability; such are:—Cash, Bills Receivable, Bills Payable, Personal accounts, &c.
- 41. Representative accounts—show only a loss or a gain: such are:—Merchandise, Expense, Real Estate, &c.
- 42. Personal accounts represent personal indebtedness; they are designated by the names of such persons and contain the relation of Debtor and Creditor.
- 43. Stock account (le compte de Capital)--represents simply the proprietor of the business or the stockholder.
- 44. On the Dr side are entered the liabilities which the business assumes to pay for the proprietor.

45. On the Cr side is shown the whole amount invested. The difference between both sides being the net investment.

#### PRINCIPLES.

I

- 46. The *Proprietor* or *Proprietors* of the business should be debited for all liabilities assumed for him or them by the business, for all amounts withdrawn as also for each one's share of the losses.
- 47. He or they should be credited for the amount invested as also for his or their share of the gains.

II

48. Cash account (le compte de Caisse)—should be debited with all receipts and credited with all disbursements.

III

49. Merchandise account (le compte de Marchandises)—should be debited with the cost of merchandise and credited with it's proceeds.

IV

50. Bills Receivable account (le compte de Billets à recevoir)—should be debited with other people's notes, acceptances or written promises to pay, when they are received; and credited when they are paid or otherwise disposed of.

V

51. Bills Payable account (le compte de Billets à payer)—should be credited with our notes, acceptances or written promises to pay, when they are issued; it should be debited when they are paid or redeemed.

VI

52. Personal accounts (les comptes personnels)-should

be debited with what the parties they represent receive; and credited with what they produce us.

#### VII

- 53. Expense account (le compte de Dépenses ou de Frais)—should be debited with all disbursements.
- 54. General Formula:—Debit what costs the concern value, and credit what produces the concern value.

#### CLOSING THE LEDGER.

- 55. Before closing the Ledger, it is necessary or at least useful to make what is called a Trial Balance, the object of which is to ascertain if the debits and credits are equal or balance.
- 56. Under ordinary circumstances the Trial Balance proves the Ledger to be correct.
- 57. All reasonable precautions being taken, there still remain two chances for errors in the accounts:—from improper Journal entries, and from posting to the wrong accounts in the Ledger.
- 58. A correct Trial Balance, affected on the principle of cancellation, may be had, which will contain simply the differences of the Ledger accounts.
- 59. Sometimes both forms of the Trial Balance are combined in one, which is found to be very convenient.

#### ORDER OF CLOSING.

- 60. The First Step, in Closing the Ledger, is to open an account with Loss and Gain, (le compte de Pertes et Profits)—if not already opened, and another with Balance (le compte de Balance.)
- 61. In the former are shown all losses and gains, and in the latter all resources and liabilities (l'actif et le passif).
- 62. The Second Step consists in ascertaining by an inventory if any merchandise remains unsold; in which case credit with such amount the account in which it was at first debited.

- 63. Each Ledger account will now show one of the following results, viz:—a Resource, a Liability, a Gain or a Loss.
- 64. Third Step.—Omitting Stock account, close all the others with the words To or By Balance, if the difference be a Resource or a Liability; with the words To or By Loss and Gain, if the difference be a loss or a gain.
- 65. The former differences are carried to Balance account, and the latter to Loss and Gain account.
- 66. Balance account will now show, on the Debit side, all resources and, on the Credit, all liabilities.
- 67. Loss and Gain will show, on the Debit side, all losses and, on the Credit, all gains.
- 68. The Fourth Step is to take a second Trial Balance of the accounts still open:—Stock, Loss and Gain and Balance.
- 69. The Fifth Step is to close Loss and Gain account into Stock, which will now show the original investment increased by the gain or decreased by the loss; the difference being the present net investment.
- 70. Sixth or Last Step.—Close Stock into Balance account, which must equalize that account. It will now present in the most condensed form the exact condition of the business.

#### APPENDIX.

COMMERCIAL FORMS. TECHNICAL NAMES AND DEFINITIONS OF BILLS, &c. EXCHANCE, &C.

- 71. A Bill—is a general name given to a written statement. The following are some of the technical names of bills.
- 72. Bill of Entry—is a written account of goods entered at the Custom House.
- 73. Bill of Right—is a form of entry at the Custom House, by which the importer may examine his goods.
- 74. Bill of Sale (facture)—is a writing given by the seller of personal property to the buyer.
  - 75. Bill of Lading (un connaissement)—is a list of goods

shipped having the signature of the master of the vessel or the proper officer of the transportation company.

- 76. Bill of Goods (une facture)—is an account given by the seller to the buyer, of articles and prices.
- 77. A bill is receipted by writing the words Received payment at the bottom and affixing the seller's name.
- 78. A bill may be receipted by a clerk, agent or any other authorized person.
- 79. A *Deed* is a species of Bill of Sale, but is generally understood as applying to conveyances of real estate.
- 80. A Chattel Note (Billet payable en effets)—is a note payable otherwise than in money.
- 81. A Check, (mandat ou chèque)—is a written order addressed to a bank, by one having funds in it, requesting it to pay to the bearer, or to another person, or to his order a certain sum specified in the check.

#### EXCHANGE.

- 82. By Exchange (le Change)—is meant that commercial usage by which debts are cancelled at a distance or money remitted by Drafts or Bills of Exchange (lettres de change).
- 83. There are two kinds of Exchange:—domestic and foreign.
- 84. Domestic Exchange (le Change Intérieur)—consists in the interchange of drafts, notes, checks, certificates of deposits, &c., the interested parties of which reside in the same country.
- 85. Foreign Bills of Exchange (le Change Etranger)—are those which, drawn in one country, are payable in another.
- 86. Bills of Exchange are generally in *sets* of three, one of which being honored, the others become void.
- 87. Foreign Bills of Exchange—are made payable in the currency of the country on which they are drawn and not in that wherein they originate.
- 88. There are always three and often four persons concerned in a Bill of Exchange:—
- 89. The *Drawer* (le Tireur, ou Souscripteur)—is the person making the order;

- 90. The *Drawee* (le Tiré, ou Débiteur)—is the one to whom the order is addressed;
- 91. The *Payee* (le Payé)—is the person to whom the Bill is payable;
- 92. The Buyer or Remitter (l'Acheteur ou Preneur)—is the person who purchases the bill.
- 93. A Bill of Exchange (Traite)—is therefore an order, made by one person upon a second to pay a certain sum of money to a THIRD or to his ORDER, or to the BEARER.
- 94. Acceptation.—If the Drawee accepts, he becomes acceptor, and writes his name across the face of the Bill, under the word accepted.
- 95. Bills of Exchange (Traites) are also termed sight drafts (Billets à vue),—when payable "at sight"; and Time Bills (Billets à termes ou à échéance),—when payable at a certain specified date.

#### PROMISSORY NOTES.

- 96. A Promissory Note (Billet Promissoire)—is a written agreement by which one party promises to pay to another a specified sum at a specified time.
  - 97. The Maker-is the person making the agreement.
- 98. The *Payee*—is the person to whom the note is payable.
  - 99. The Holder—is the owner of the note.
- 100. The *Principal*—is the party directly responsible for the payment of the note at maturity.
- 101. A Joint and Several Note—is a note signed by two or more distinct parties, each one becoming liable as maker or principal.
- 102. In order that a Promissory note should be valid, a valuable consideration, not one founded on friendship—is absolutely necessary. The money should be definite in amount and independent of all contingencies, which amount is expressed in the body of the note in words.
- 103. Bank notes, checks, certificates of deposits, Bills of Exchange, &c.,—when not made payable by the terms of contract to one or several specified persons only—are negotiable;—i. e., can be taken and given in payment, Example:—Bank Bills.
